- 19 VENUS, carved in low relief upon an upright plaque of hone-
stone, by ALBERT DÜRER, signed with a monogram and dated
1509—6 in. by 2½ in.

The goddess is represented with her back turned to the spectator, resting her right elbow on a pedestal, upon the upper part of which is the artist's signature and date, in low relief; her head is bent slightly forward and inclined to the right, the hair braided with four plaits and coiled round the head—a coiffure characteristic of the epoch; her left hand is drawn slightly backwards holding a narrow drapery scarf that falls to the ground; the weight of the body is centred on the left leg, the right leg idly crossing it, the foot of which is concealed in the folds of the scarf

- 20 A SHRINE, OF IVORY, known as the "VIERGE DE BOUBON."

A triptych of the 13th Century—17 in. high, 10⅔ in. wide with the open volutes

It is shaped as the figure of the Virgin, enthroned, holding in her two hands a quatrefoil-shaped panel on which is carved in almost full relief the seated figure of the Saviour, His left hand resting upon the Imperial orb, His right hand raised in benediction; the pedestal on which rests the Virgin is formed of a tripartite Roman arch, incised to represent masonry; in the niche is carved in high relief a recumbent figure of the Virgin. The whole figure opens down the centre and is hinged at the side; the interior in the centre presents the Crucifixion, the Entombment, and above, in a quatrefoil-shaped panel supported by Angels, the Lamb of St. John; on one volute the Judgment of Pilate, the Flagellation, and Christ bearing the Cross; on the other volute, the Resurrection, the Women at the Sepulchre, and Christ appearing to Mary Magdalene

The Monastery of Boubon, situated in the Canton Oradour sur Vayres (Haute-Vienne), was founded in 1106 by Robert d'Arbeissel

730. 24 A CINQUEDEA, the grip and pommel of wood, covered with copper and overlaid with silver—*Venetian, late 15th Century*

The pommel is spade-shaped, on one side decorated with niello, representing the bust of a Roman Emperor enclosed in circles, around which are children's heads and arabesques, a label beneath lettered "AD. IN. PE.," apparently intended for Hadrianus Imperator; on the reverse the copper and the silver have been removed, perhaps to conceal the owner's arms. A mounting of gilt metal, with trophies of musical instruments in relief, passes around the upper part of the pommel; the grip is formed of a double cone, flattened, with eight facets; on those of the front and back, which are broader than the rest, are musical instruments and other small ornaments in silver on niello; on the lesser facets are arabesques of niello on silver; the quillons droop and are decorated with gilded arabesques of foliage interspersed with shields, in relief on a dark ground; the blade is $20\frac{1}{2}$ in. long, and is etched and gilt

Exhibited at the Burlington Fine Arts Club, 1901

165. 25 A MALE STATUETTE, silver-gilt—mark "K" in a rectangle— $7\frac{1}{4}$ in. high—*Flemish or German, 15th Century*

Standing figure bearing the palm of martyrdom and an open book, clothed in the alb and tunicle of a deacon, with a fanon over the left arm; the head, slightly bent, is tonsured, the hair in curling locks; the face, hands and alb are left in silver, the rest gilt; the pedestal is moulded and octagonal, parcel gilt; a small receptacle for a relic is fixed to the front

90. — 28 A LADY'S BELT, formed of a number of pierced silver-gilt discs showing coloured enamel beneath, mounted on a narrow band of crimson velvet and gold thread, with chased and engraved clasps, one set with a coloured enamel finial—65 in. long—French, late 14th Century *Davis*

From the Collection of M. Ernest Odier

From the Collection of Martin Heckscher

17. — 29 A PAX, of bronze gilt—4 $\frac{3}{4}$ in. by 3 in.—French work, early 14th Century

It is entirely of copper-gilt, of rectangular architectural form, with buttress at the side, finishing above in pinnacles and castellation; in the centre beneath a semicircular arch is applied a figure of Christ Crucified, with the Virgin and Saint John on either side; the background is occupied with fleur-de-lys reserved in the metal upon a blue champlevé enamel ground

See Illustration

135. — 30 A CROZIER, of copper-gilt—French work of the end of the 13th Century *Wallis*

The volute finishing in a spiral curl, roughly fashioned as the head and body of a monster, in the centre of which is a group of Saint Michael and the Dragon; the knob is flattened, and moulded with interlaced monsters; the haft socket cylindrical, with three applied figures of dragons; the surface is variously engraved and set with coloured cabochon stones

160. 31 CIBORIUM, of architectural design, on stem, silver parcel-gilt
—17 in. high—*Italian, late 14th Century*

The receptacle is hexagonal with a pointed roof, crocketed at the angles, scored to represent masonry, and surmounted by a knop, which serves as the base of a crucifix; the sides represent traceried windows of Tuscan-Gothic design, crocketed and with flame-shaped finials; the moulded and traceried work is gilt, the rest oxidised silver; the receptacle opens horizontally across the arches and is hinged; the stem is high and hexagonal, plain, except the knop, of architectural form, with buttresses and windows, and the similar small hexagonal base; the foot is flattened with six slightly curved sides, the whole gilt except the undecorated stem; on the foot are six triangulated plaques, chased in low relief, with traces of red enamel in the corners: one with the Crucifix and two Adoring Angels; one of Saint Peter; three with female figures, perhaps representing the theological Virtues, and having by their sides shields charged with a plant, the broom (?); and Christ bearing the banner of the Resurrection; the vertical sides of the foot bordered with pellets. A stamp in the foot with "BEAV:".

55. 32 A RELIQUARY, altar shape, of wood, covered with repoussé silver plates—6½ in. high, 3½ in. wide—*French (?), early 12th Century*

The pyramidal cover, surmounted by a crystal ball, is of bronze; the sides are embossed with a Romanesque design of vine, in a pattern derived from the Greek honeysuckle; the upper part overhangs and is broadly chamfered below; the vertical part has a running scroll-pattern of more delicate design, and the sloping surface has an early trefoil pattern, from which the Gothic trefoil was developed; these are counter-changed on the alternate faces; the chamfer repeats the running scroll on a smaller scale, the vertical repeating the trefoil; the base resembles the top; the chamfers are gilt

- 260 — 33 A BOAT-SHAPED INCENSE VESSEL, OR "NAVETTE," in gilt copper
—10 in. long, extreme height $4\frac{1}{2}$ in.—North Italian work, circa
1460

The cover is in two divisions, one of which opens as a lid, and both are engraved with floral ornament surrounding a quatrefoil containing, in the one case, a figure of St. Catherine of Alexandria, and in the other, that of a sainted bishop. This last was formerly concealed by a copper plate, engraved with a similar figure (probably of a successor), attached by solder; this has been removed, and is now fixed on the under side of the lid; the body of the navette is fluted longitudinally, and stands on a lobed foot; a winged dragon forms a handle at each end. The use of this vessel was to contain the incense burnt during the service of the altar; the ancient spoon with which the incense was put into the thurible is preserved with the present specimen

- to — 34 A CHALICE, of silver-gilt, decorated with applied plaques
enamelled with heraldic shields and other ornament—12 in.
high—Spanish, dated 1620—(40 oz. 8 dwt.)

Brauer

Round the foot runs the inscription: + ES DE LA CAPILLA DE LAS ANIMAS DE PURGATORIO Q[UE] FVNDÓ LA BVENA MEMORIA DEL CAPITAN GARCILASO INCA DE LA BEGA EN LA S[ANTI]S[IMA] IGLESIA DE CORDOVA SIENDO ADMINISTRADOR EL S[EÑOR] D[ON] ALBARO PICANO DE PALACIOS, 1620, recording that the chalice belonged to the Chapel of the Souls in Purgatory endowed by Captain Garcilaso Inca de la Vega in the Cathedral of Cordova

Garcilaso (or Garcilasso) de la Vega was born at Cuzco, Peru, in the year 1540. His father, of the same name as himself, was of the family of the Dukes of Feria, and, attaching himself to Pizarro in the conquest of Peru, eventually married a princess of the Incas, the ancient royal house of that country. Garcilaso the younger was thus of mixed blood; he acknowledged his maternal descent, of which, Prescott says, he was "not a little proud," by subscribing himself "Garcilasso Inca de la Vega." After serving under Don John of Austria against the Moriscos of Granada, he finally devoted himself to literature, producing in 1590 the 'Dialogue on Love' (a translation of a work by Abarbanel, a Jew,

308

34

expelled from Spain), and in 1605 a 'History of Florida'; but his great achievement, and that on which his lasting fame is based, is the 'Commentaries on Peru,' of which the first part, devoted to the history of the country under the Incas, was published in 1609, and the second, embracing the story of the conquest, in 1617, after its author's death. Garcilaso died in 1616, and was buried in the "Capilla de las Animas," which he had endowed.

The heraldry appears to include the arms of Cordova, Counts of Feria, and of Garcilaso de la Vega. (*See* Rietstap, J. B., 'Armorial Général; and Imhof, J. W., 'Recherches Historiques et Généalogiques des Grands d'Espagne.')

35 THE COVER OF A TESTAMENT—7¼ in. by 7½ in.—

Spanish work of the 11th Century

It is of wood with a sunk upright rectangular panel in the centre, the whole overlaid with plates of silver-gilt; in the centre is represented the Crucifixion, the figures of Christ, the Virgin and St. John being carved of ivory; beneath this is embossed the inscription FELICIA REGINA; the framing of the centre composition much resembles that of No. 36, but in addition to the cabochons of various stones, minute panels of cloisonné enamel have been used. M. Emile Molinier gives the following interesting description of Queen FELICIA: "Félicie, fille du Comte Hildhuin, et d'Adèle de Chatillon mourut en 1085. Femme de Sanche Ramirez, V^e du nom comme roi de Navarre et 1^{er} comme roi d'Aragon"

120— 36 THE COVER OF A TESTAMENT— $10\frac{1}{4}$ in. by $8\frac{1}{2}$ in.—

Spanish work of the 11th Century

In the centre is a plaque of ivory, $5\frac{1}{2}$ in. by $3\frac{1}{2}$ in., carved in relief with the Crucifixion with the Virgin and Saint John on either side. Angels above; the nimbus and details of the cross show remains of gilding; around the ivory plaque is a deep frame of silver-gilt, upon which is applied a scrollwork design in filigree; the border is further enriched with cabochon, crystal and coloured pastes; the whole is mounted on a strong foundation of walnut-wood

550— 37 A PORTABLE ALTAR— $14\frac{3}{8}$ in. by $10\frac{1}{2}$ in.—*Lihenish work, late 12th Century*

It is composed of a plaque of lumachelli marble, inlaid in a panel of wood, which is enclosed in a metal-gilt case; the centre of the case has been cut away in a rectangular shape, leaving the uncovered marble, upon which rested the chalice during the celebration of mass; there is also an opening in the metal casing above and below the centre stone, into which are inlaid, fixed to the wood, two bas-reliefs of ivory, the one above representing the Crucifixion, with the Virgin and Saint John, the one below the Madonna and infant Christ, attended by two Saints; there are also two other openings on the right and left of the stone panel; these enclose panels of rock-crystal, behind which are miniature paintings of Saints upon a gold ground; no doubt these miniatures, which are of late 13th Century date, replace the relics that must have formerly been behind the crystal faces; the flat framework is engraved with medallions enclosing symbols of the evangelists Saint Peter and Saint Lawrence, &c., and the inscription THIDERICUS ABBAS III^{us} DEDIT, "given by the Abbot Thidericus, third of his name"; the back of the tablet bears the following inscription: JOANNIS BAPTISTE PAULI APOSTOLI JACOBI APOSTOLI MATHEI APOSTOLI ET EVANGELISTE JOHANNIS EVANGELISTE STEPHANI PROTOMARTIRIS LAURENTII VITI CORNELII CIPRIANI FABIANI SEBASTIANI BONIFACII EPISCOPI BLASII EPISCOPI FELICIS CRISTOPHORI COSME DAMIANI PANCRATII THEODORI DIONISII EPISCOPI MARCELLINI PETRI CIPRIANI IPOLITI VITALIS FELICISSIMI MAURICII IACINCTI TOTINATI FELICIS NAEORIS MARTIRUM ET CONFESSORUM GODEHARDI EPISCOPI NICOLAI SERVACII MARTINI BENEDICTI ABBATIS EGIDII MARIE MAGDALENE AGATHE MARTIRIS THIDERICUS ABBAS TERTIUS DEDIT.

From the Collection of M. Renesse-Breidbach, in the Catalogue of whose Collection it states that this altar came from the ancient abbey of Sayna, near Coblenz; but, however, from researches made more recently, it was probably a gift made in the middle of the 13th Century to the abbey Scheida

300. 66 A CROSIER, in Limoges champlevé enamel— $12\frac{1}{4}$ in. high, by $5\frac{1}{2}$ in. across—*French, the end of the 13th Century*

The entire portion of the exposed metal-work is gilt, and set with turquoise, the haft socket having formal trefoil leaf ornaments on a blue ground; the volute, finishing in a spiral curl, is formed as a snake or monster, enamelled with scales, also in blue; in the curl is a group, of Saint Michael and the Dragon; the knob is of depressed form, pierced and embossed with intertwined monsters.

The use of the crosier or pastoral staff is simply as an emblem of authority; its signification in fact is analogous to that of the sceptre of the king or the mace of the municipal ruler. Its origin has been fancifully supposed to have been derived from the lituus of the ancient augurs—a short curved wand or crook held in the hand during the ceremonies of sacrifice and divination. The most ancient monuments in which the pastoral staff occurs, represent it indifferently of three different models; first, that of a crutch or tau; secondly, that of a long wand surmounted by a ball and a small cross; and thirdly, in the usual voluted form. The crosiers of the first and last of these models, in the earliest periods, were frequently not longer than ordinary walking staves, and were evidently held in a similar manner, i.e. by the crutch-shaped cross-piece, or the crook or volute. The resemblance of the voluted staff to the shepherd's crook probably at last fixed the orthodox conventional shape, and it thus occurs on various ancient monuments at least as early as the ninth century. In the ages of symbolism, indeed, the striking and pertinent analogy of the episcopal office to that of the pastor, consecrated moreover by our Saviour's parable of the good shepherd, could scarcely fail to cause the final adoption of this form in preference to that of the common walking staff, whilst the long ferule surmounted by a ball or small Maltese-shaped cross, seems to have become (in actual use) especially, if not exclusively, assigned to the Pope, who never uses the crosier, and in plastic representations to have become the attribute of archangels and heavenly powers. It is evident

Hardy

in short, that the fixing of the crosier in its present shape was the result of a gradual concretion of various natural and mystical ideas, and that no precise dates can be assigned to any of the various changes and modifications of its form which have taken place.

69 A CIBORIUM, SILVER-GILT AND ENAMELLED—height to the apex of finial 18 inches, diameter of base $10\frac{1}{2}$ inches

The receptacle is hexagonal, laterally compressed, being 6 in. long and $2\frac{1}{4}$ in. wide; the roof is sloping, slightly curved, hinged, with a cresting of cast trefoils at the base, and scrolled crockets up the ridges, each rolled up and applied separately; the crocketed finial probably replaces a group of the Crucifixion; the six triangular spaces are filled by six enamelled plaques with half-length figures of Saint Peter, Saint Paul and the Four Evangelists; these, like the rest of the enamels, are basse-taille with translucent blue backgrounds, some of the robes in translucent lilacs and greens, the faces and hands in silver and niello; the backgrounds of all the enamels, where possible, are powdered with a small composite flower, possibly the dandelion; the body of the

Seligman

receptacle is panelled, the panels divided by low-pointed arches with crockets and separated by pinnaced buttresses; behind the arches are enamelled plaques, the spandrils filled with foliage, and the main panels containing a representation of the Nativity, flanked by the Flagellation and the Crucifixion; on the other side the Adoration of the Magi, flanked by the Annunciation and the Betrayal; in the Adoration of the Magi the Kings have forked beards, crowns, short tunics and tight hose and swords, which agree with the costume of our Henry IV.; the upper part of the receptacle corresponds with the cover, but has no enamels; the stem is hexagonal and plain; the knop is large and compressed, with six lozenge-shaped studs enamelled with a dandelion on blue ground; the facets above and below have engraved tracery gilt on a hatched silver background; on two sides immediately above the knop rise ogree-shaped arms or branches bordered above and below with crockets like those of the receptacle; the two extremities are expanded to form bases supporting figures of Angels turned towards the front, in sleeved tunics reaching to the feet and girt at the waist; the hair is full and flowing, some of the locks gathered over the forehead and tied there by a fillet in the manner of the classic krotulos; these hold candlesticks, and have long pointed erect wings; the base of the stem is surrounded by six Gothic canopies containing basse-taille enamels with busts of Saints; the foot is very large, slightly elliptical, splayed, and of six lobes, two of which are smaller than the rest, with two points divided by acute salient angles; on the surface are three panels of basse-taille enamel with figures of Angels, two of them by a different and superior hand to the rest of the enamels, bearing shields with arms, one chequy argent and sable, the second of two pales gules, impaling the first coat, the third of a chief gules impaling the second coat; in one the shield is borne by two Angels in long robes of purple and brown with tight sleeves, bare feet, long curling hair and green wings; the plant at their feet bears the dandelion with which the backgrounds of the receptacle are powdered; the Angels on either side in the second panel are similar, except for the colour of the robes, to the first; a third Angel, in three-quarter length, supports the shield from above under a cloud ornament, constantly found in German fifteenth century work; the third panel, considerably smaller, resembles the last, but is by the same hand as the enamels of the receptacle; the three alternate panels not enamelled are engraved with trees of foliage in a spirited manner, two containing apes, birds, etc. among the foliage; the backgrounds are slightly sunk and finely cross-hatched; the vertical base is pierced with a lozenge design filled with quatrefoils, and rests upon six seated lions on plain bases; inside the receptacle is engraved a Gothic A

 $8\frac{1}{4}$ in. high by $3\frac{3}{4}$ in. diam.—and cover—*German work, 14th Century* *Harding*

The crystal goblet is polygonal, i.e. cut into twelve vertical facets, and near the top is a projecting torus, or bead moulding, cut from the mass of the crystal; the silver-mounting of the base, margin of the beaker, and the cover, all follow the shape of the crystal; and the hinged cover forms an ogee-shaped dome, the point surmounted by a ball; the vase is supported on three slender animal's legs or paws, and three narrow vertical straps in silver connect the mountings of the base with those of the upper part and cover; around the base is a band or fascia enriched with champlevé translucent enamels, green and blue in the alternate facets, forming the background of an inscription in bold Gothic characters and in an old German dialect, which is continued all round and reads as follows:—"WER'HIER'US'DRINOGET'WIN'DER'MUEZZE'IERMER'SELIG'SIN," which, translated as a similar distich, may be "WHOSO DRINKS WINE IN ME, SHALL EVER HAPPY BE"; in the inside of the cover at the top, is a hook, evidently fixed there in order to suspend some object within the crystal cylinder. It is difficult to determine the use of this cup; it is ill adapted for a drinking vessel, whilst the mundane character of the distich, and the absence of devotional insignia, seem to preclude the idea that it was intended as a reliquary, for which its general shape and design would otherwise seem to have adapted it

151 A PASTORAL STAFF, in carved bone—*entire length of staff, 6 ft. 9 in.; $9\frac{3}{4}$ in. wide across the volute—Italian work, 14th Century*

The head of this crosier is composed as follows:—The knob is a large rhomboidal mass formed from a square block by cutting off the angles, so as to leave four lozenge-shaped spaces at the sides; these are filled in with emblems of the Evangelists carved in low relief. The shaft of the volute rises above this in the shape of a dragon's head and neck, with gaping mouth, from which grows the volute, enriched on the outer margin with ten boldly projecting leaf-shaped crockets rudely carved; the volute encloses a lamb with the stem of a cross or banner (the upper part of which is broken away) and also in the upper part a dove. The extremity of the volute forms another dragon's head with gaping mouth, thickly set with teeth, and apparently menacing the lamb; the head and shaft of the crosier are diapered over with floral ornaments, rosettes, grotesque dragons, and other animals, rather coarsely executed in surface gilding, outlined with red and black. Other crosiers of this identical type, most likely produced in the same district and at the same period, are still preserved; they are apparently of North Italian origin. It is difficult to determine their approximate date with any certainty; it is probably, however, later than might be at first supposed. The quasi-Byzantine style, especially marked in the diapered ornaments painted on them, would apparently indicate the 13th or earlier part of the 14th Century; but, judging from other details of a more modern aspect, it seems more likely that these seemingly very ancient motives were only traditionally or prescriptively retained in some remote districts

Crosiers enclosing a lamb, with a cross in the volute, menaced by

a dragon, were a favourite type, particularly in the 12th, 13th and 14th Centuries. As a mystical emblem of the contest of Our Saviour with the Evil One, this design is too obvious to require further elucidation
